Continuation of 11. does NOT place the application in condition for allowance because: See reasonings given in the Final Rejection filed 9/2/05. The Affadavit filed 12/30/05 has been considered but not found persuasive as the claims are not commensurate in scope with the Affadavit. The Affadavit recites in section 7 that the magnesium vapor pressure is critical for successful deposition of magnesium diboride on silicon substrates as defined by Fig. 1 and specification pg. 6, line 27 - pg. 7, line 6. The claims do not recite this critical element. If Applicant were to provide claims commensurate in scope with the arguments/showing, the Examiner will reconsider his position.
